FAX TRANSMITTAL SHEET

DATE: July 29, 1997

TIME:

TO: Gary Bardini

RECEIVING FAX NO. 653-5699

MESSAGE:

Gary:

The attached tables are intended to generate estimates of the volume of water pumped by each of CVP Dos Amigos and O'Neill for SWRCB case 469 based on the comparison we discussed yesterday and the data available through the Web page.

Table 1 is the Control Point 745 actual downstream data for CVP Dos Amigos. Table 2 is the sum of results for Control Points 712 and 720, less volume at Control Point 806 to estimate O'Neill. Tables 2A, 2B and 2C then show support the Table 2 calculations.

Is this the correct approach? Thanks. Please call me if you have any questions.

FROM: Eric Leuze
